Community Notice: Oxford Street (Everett to Garfield) Improvements

On Tuesday, October 11, 2005 (weather permitting), Harvard University's contractor, JF White, in coordination with the City of Cambridge, will begin construction on Oxford Street (between Everett Street and Garfield Street). The City and the Agassiz community asked Harvard to make these improvements associated with Harvard's development in the Oxford Street area. The Oxford Street project is consistent with the City's prior traffic calming plans and includes:

- Traffic calming (raised devices) at the intersections of Wendell Street and Garfield Street; and,
- Roadway repaving from Wendell Street to Everett Street.

This project is expected to take approximately two months to complete, though it may take longer due to weather or unforeseen utility conditions.

Be advised that there will be traffic disruptions during this construction. “No Parking Signs” will be posted 24 hours in advance of all work. Please refrain from parking in the affected areas during the posted work hours of 7 AM to 4 PM. If you have any *special need or disability*, please contact the Harvard Mitigation Office.

We apologize in advance for any inconvenience you may experience during this construction. If you need assistance or have questions about this construction, please contact Harvard's Construction Mitigation office at (617) 496-0857. You can also contact Cambridge's Superintendent of Streets and Sidewalks, William Dwyer, at (617) 349-4851/ wdwyer@cambridgema.gov.

We are pleased to be a part of this project with the City and the community and we hope you enjoy these improvements once they are completed.

Sincerely,

Thomas J. Lucey
Director of Community Relations
Harvard University
